Minimal Test Report

1. Setting project in IntellijIdea - success
2. Running ./gradlew test (unit tests) - 44/44 tests executed successfully
3. Running in debug mode - success
4. Packaged plugin for publishing using ./gradlew buildPlugin - success
5. Installed plugin in IntellijIdea from zip archive - success
6. Open plugin window - success
7. Click to login - browser trying to open 'localhost' link
8. Selected local configuration
9. Added model OpenAI/GPT-5.2 to local config
10. Sent a message to the model - got error - request to https://127.0.0.1/responses failed, reason: connect ECONNREFUSED 127.0.0.1:443
11. Added model Groq/Llama3.1 405b Chat (uses OpenAI Adapter) to local config
12. Sent a message to the model - got error - Connection error.
13. Added apiBase: http://google.com field to the model in local config - red popup with the following message: Error loading *Local Config*. Chat is disabled until a model is available. View: Failed to parse config: models.4.apiBase: Invalid - no possibility to use plugin screen and choose models.
14. Repeated steps 9-14 with different models - got the same results - no external API calls are made.
